St John’s Land  

18 June 2013  

Dear Sue  

Gathering expertise from parents of children with autism on using technology at home  

The School of Education Ethics Sub-Committee has now considered your request for ethical approval for the studies detailed in the your application.  

This is to confirm that the Sub-Committee is happy to approve the application and that the research meets the School Ethics Level 2 criterion. This is defined as "covering novel procedures or the use of atypical participant groups – usually projects in which ethical issues might require more detailed consideration but were unlikely to prove problematic".  

A standard condition of this ethical approval is that you are required to notify the Committee, of any significant proposed deviation from the original protocol. The Committee also needs to be notified if there are any unexpected results or events once the research is underway that raise questions about the safety of the research.  

Yours sincerely
